

APS Security & Fire are currently recruiting for a Service Engineer

We are looking for an experienced Service Engineer to work with our bespoke, solution driven fire and security systems. We work with fire alarms, CCTV, intruder alarms, access control and other integrated systems.

Duties will include but are not limited to:

- Install maintain and service security systems equipment
- Commissioning of security systems
- Ensuring system functionality categorisation
- Assessments of current systems for new customers
- Being on call feeding back to the office

Skills and Experience:

Applicants will have a minimum three years experience in the security or fire system industry. Desirable applicants will have experience working with different types of clients including commercial/retail, charitable organisations and public offices. You will be able to work independently, managed your own workload and have excellent rapport with new and existing customers. This role requires a full clean driving license.

Details:

Competitive rate of pay, paid call-outs and standby rates, vehicle with private use if required, pension and attractive benefits package. This is a unique opportunity to work for an NSI Gold and BAFE approved fire and security company.
