

APS

SECURITY & FIRE

**Fire Alarms • CCTV • Intruder Alarms
Access Control • Integrated Systems**

Whatever the size of your business or organisation, incidents of fire, theft, breakins and vandalism can seriously disturb daily operations. Many companies ignore the real cost of a security breaches until it is too late.

Intruder Alarms

An electronic intruder system will provide a deterrent against breakins to your premises. APS installs highquality systems that ensure peace of mind should someone try to enter your premises. Our own staff and the police will be informed immediately and you will be contacted.

Fire Alarms

Our team will ensure your fire alarm system is fit for purpose and legally compliant whilst protecting your employees and your business. We offer Fire Assessments, Disabled Refuge Alarms, Fire Suppression System and maintenance.

CCTV Systems

CCTV is a vital tool for prevention of theft and breakins. We can install surveillance systems to monitor areas around the workplace or CCTV around external areas of your building. Our equipment can survey automatically, or with the assistance of an operator.

Access Control

Access Control is the solution for businesses and organisations that need to allow the free flow of authorised persons whilst denying entry to unauthorised and unwanted visitors. All our systems are designed and installed by our qualified technicians.

Integrated Systems

Any of the systems that APS designs and installs can be integrated with each other. Integration does not stop with security and fire systems. Building and energy management technologies can also be linked with our systems. Automation is efficient, cost effective and can eliminate human error.

APS is Quality Assured

We are BS EN ISO9001 quality accredited. We also hold accreditation from the National Security Inspectorate (NSI) Gold Approval for all the services we offer. These include:

- British Approval for Fire Equipment (BAFE) SP 203 Scheme. Certified to design, install, commission and maintain fire alarm systems.
- British Standards Institution (BSI) which is the trade association for the professional security industry in the UK.

All NSI Gold approved companies meet the requirements of the police through the Association of Chief of Police Officers (ACPO) policy on intruder alarms, who will respond to confirmed alarm activations for monitored systems.

Why you should choose APS Security & Fire

- We are rigorously inspected twice a year to ensure we are maintaining standards in both quality of installation and how we run as a business
- Our installation staff have been thoroughly security vetted through the Disclosure & Barring Service (DBS)
- All staff are vetted in line with the National Police Chiefs Council (NPCC) Association of Chief of Police Officers (ACPO) policy to ensure suitability of employment.
- We operate a 24 hour callout service with response time in 4 hours
- We complete a thorough security survey of your premises
- All equipment we install is superior quality and reliable
- All jobs are issued with a Certificate of Compliance
- We meet the relevant UK and European Standards
- We operate to the highest level of business excellence through achievement of ISO9901 Quality Management
- We meet the requirements for insurers who often insist that you use an NSI Gold approved company
